PROFILE

Cybersecurity engineering student at ENSIAS, with hands-on experience in log analysis, threat intelligence, and Python scripting for security applications. I am looking for a 2-to-3-month summer internship in a SOC environment to strengthen my skills in threat detection and penetration testing.

EDUCATION

ENSIAS - National School of Computer Science and Systems Analysis Cybersecurity, Cloud and Mobile Computing Rabat, Morocco	2024 - 2027
CPGE Lycée Mohamed V Preparatory Classes for Engineering Schools - TSI Track Béni Mellal, Morocco	2022 - 2024

EXPERIENCE

Automated Wi-Fi Authentication System – Internship Project <i>Internship</i>	07/2025 - 08/2025
· Built a captive portal prototype for automated Wi-Fi access in a coworking space. · Developed a backend authentication system with email token validation and device registration. · Implemented MAC-based device association and session logging. · Designed database models for members, sessions, and access logs.	

PROJECTS

Vulnerability Detection In OWASP JUICE SHOP <i>PFA - End-of-Year Project</i>	06-07/2025 ENSIAS
· Security analysis of a vulnerable web application (OWASP Juice Shop) through manual penetration testing, log analysis, and threat detection (SQLi, XSS, broken access control). · Development of a Python-based IP reputation tool (IPinfo.io, AbuseIPDB) to classify addresses as Safe, Suspicious, or Dangerous. · Validation of cryptographic vulnerabilities: JWT brute force, token forgery using the "none" algorithm, and dictionary attack on MD5 hash.	
Vulnerability Assessment Using an Open-Source Scanner <i>PFA - End-of-Year Project</i>	02-05/2025 ENSIAS
· Comparative study of open-source scanners (Nmap, OWASP ZAP, Nikto, OpenVAS) and deployment of OpenVAS on Kali Linux. · Detection and analysis of critical vulnerabilities in a test environment with CVSS reporting.	
Study and Implementation of a Smart SIEM <i>Ongoing Project</i>	Feb. 2026 - Ongoing ENSIAS
· Implementation of a SIEM solution for collecting, correlating, and centralizing security logs. · Design of detection rules and dashboards to identify suspicious behavior and improve SOC monitoring.	

TECHNICAL SKILLS

Programming Languages	Python, C, Java
Security Tools	OpenVAS, OWASP ZAP, Nikto, Burp Suite
Databases	MySQL, Oracle SQL Developer, SQLiteStudio
Network Tools	Packet Tracer (Cisco), Wireshark, GNS3, Nmap
Development Environments	Visual Studio Code, Eclipse, Node.js, Altova, Oxygen XML
Other Tools	Matlab, Docker

LANGUAGES

Arabic	Native language
French	Fluent
English	Intermediate

INTERESTS

Active participation in technical clubs and volunteer organizations
